ACCEPT RESIGNATION OF SCHOOL TEACHER

Board of Education Holds Regular Meeting—Deals With Architects of New School—Phew! Kids Are Suffering From Pediculosis—Good Attendance At Both Schools.

The regular April meeting of the Board of Education was held in the council chamber on Thursday evening last, when the following were present: S. F. Williams, chairman, J. A. Campbell, Dr. D. Clark, J. A. Marshall, G. B. McConchie, Dr. J. F. McFar, A. E. Phillips, R. T. Threl, Vernon Tuck, J. H. Wells.

Burden and Gouinlock architects presented an agreement for the board's ratification for professional work on the new high school, and Chairman Williams, and Secretary W. J. Randall were empowered to execute the agreement.

On motion of Phillips and Campbell the football club was granted the use of school grounds for practice and regular games.

Accounts for March amounting to \$204.28 were passed, and \$164.50 paid for substitute teachers.

The resignation of Miss Laura Hamilton, of the public school staff was tendered, and came as a surprise to the board, but was accepted, with some comment.

The reports of J. R. Jackson, principal of the high school, J. H. Foran, principal of the public school, and Miss M. M. Collier, school nurse, were presented. In the high school there are 140 on the roll of which 78 are from the town, 49 from Lincoln county (North), Grimsby, and 19 from Westwindsor, Ontario (South).

There are 79 girls and 67 boys. The average attendance for March was 123.

The report of the public school shows that an average of 90 per cent. attended during March, as follows:

Attendance	On Roll
Boys 5	67
Girls 5	79
Boys 4	65
Girls 4	77
Boys 3	63
Girls 3	75
Boys 2	61
Girls 2	73
Boys 1	59
Girls 1	71
Boys 0	57
Girls 0	69
Total	123

The report of Miss Collier showed five visits during the month, 498 inspections made; new defects found 15, corrected 14; pupils practicing health habits 70 per cent.

The teacher had no-operated with the nurse; the nurse was well kept, but the absence of drinking fountains was deplored. The nurse also regretted the prevalence of pediculosis among pupils.

MAKE VEHICLES CARRY LIGHTS
County Council Now Have Privilege of Passing Bylaw Compelling All Rigs on Highways to Have Lights at Night

Over twelve years ago The Independent took up the question of the Ontario government passing a law compelling all vehicles that travel on the highway at night to carry a light front and rear. The Independent was the first to take up this question but as time went on other newspapers and municipal bodies agitated for a law of this kind.

The question has been brought up in the legislature several times during the past five years but no action was ever taken until last week when the municipal committee of the legislature approved legislation making it optional for each county to pass bylaws requiring all motor vehicles on a highway to carry a light or reflector after dark and before dawn.

This is a move in the right direction and Lincoln county council should at its very next meeting pass a bylaw compelling all vehicles in this county to carry lights.

THE HOME MERCHANT WHO IS HE?
He is the chap who gives you back your money or makes exchanges when you are not satisfied with what you have purchased.

LOOKING FOR TROUBLE!

You will never fear the trouble that comes your way if you are cheerful; neither will you enjoy the blessings of each day if you are fearful.

The man who is looking for trouble usually doesn't have to step out of his tracks to find it. Trouble is the blindest thing that flies and makes a "bee line" for anyone who calls it.

The trouble hunter is generally overstocked. He goes on making new loans all the time, but nobody ever bankrupted the Trouble Bank.

FINAL PLANS OF HIGH SCHOOL

Board of Education Give Approved Specifications—Expect to Have Building Ready for Use by September

The board of education members assembled on Friday night to meet and make a final revision of the new high school plans. Nothing was done in the way of changes except for a few minor matters affecting local conditions, and the plans and specifications as adopted at the meeting will be ready this week when the board will immediately be called for.

When the close proximity of the school to railroad sidings, the comparatively short haul for stone, sand and brick, and the ease with which the excavation can be made, are taken into consideration, with reasonable weather and a good contractor the building should be in such shape at the end of the summer holidays that classes can be started.

GOOD LOOKOUT FORG. C. S. & I. CO.

The Growers Cold Storage and Ice Company is preparing for a very busy season. This plant is capable of turning out 20,000 tons of ice a year, and although the firm has a large connection and delivery service already established in the district, it does not begin to take the output. This year the management has arranged to supply Niagara Falls exclusively, getting in their own ice house and delivery system.

They have also built ice houses at London and Kitchener, the company using their own refrigerator cars to transport the ice to these different towns.

SUN SHINES ON BACK OF FORD

(N.M.)
Now we know why we have had so many dull days lately. Jerry Simpson is what the people here call the "sunshine" of the town. A good deal and has not been on the streets to disseminate sunshine.

"Jerry Simpson, Sun Life of Canada" is what the people here call the "sunshine" of the town. A good deal and has not been on the streets to disseminate sunshine.

But if Jerry has a corner on the sunshine it should be arranged that he leave some of it around town when he goes into the country to spread the sunshine of insurance.—Sun Life

IT'S NOT DONE

In its issue of April 3rd 1923 The Spectator of Hamilton, printed an item to the effect that:

"The city school teachers have resolved to do away with the Easter holidays, and have petitioned the school trustees."

"Any Board of Education ever received such a resolution as the above, necessary as it might be, would be put to the expense of a new election, because the old board would all be dead from the shock."

Do you think you ought to trade with him? Don't you know that the growth and prosperity of this town depends very largely upon the success and prosperity of its home merchant? Out-of-town people judge our town by the appearance of our stores and by the degree of enterprise shown by our merchants. And our home merchants succeed when home folks give them loyal support.

Make a resolution to Buy at Home.

EVERY EVIDENCE THAT BUSINESS IS IMPROVING

BERRY BOXES; FRUIT CRATES

E. B. Johnson's New Factory on Elizabeth Street Prepared to Turn Out Large Quantity This Season—Modern Methods in Fruit Industry

Modern packing and shipping methods for the fruit industry are coming from the front rapidly, and along with the new sizes of Government regulated berry boxes is making the manufacture of fruit boxes and crates a big industry in Grimsby. And especially in the box packing before looked after by E. B. Johnson, on Elizabeth street. This business started by J. W. Dalton and purchased last year by Mr. Johnson, has in the past decade grown to an extent that would surprise any but those closely familiar with the fruit industry.

The original factory had long since outgrown its capacity and frequent additions made, but this year it was found necessary to again extend on an entirely new concrete-floored building 40 by 40 feet was erected some distance from the old factory which is now used exclusively for storage.

Among the products of this plant are peach boxes 4 x 11 x 13 inches, and 4 1/2 x 11 x 13; pear boxes 1 1/2 x 11 1/2 x 11 1/2; apple boxes 1 1/2 x 11 1/2 x 11 1/2; (outside measurements) all government standard; lettuce crates, green-house flats, carrying flats; cases for building four, 4 1/2, tin-top containers for plants, tomatoes, grapes, etc.; 37-quart and 54 and 56-pint crates.

It has been found that the government standard quart berry boxes are a little too large for the size carrying of raspberries so the majority of the orders for raspberries are made, though the quart is preferable for all else.

Another product of some import is a standard tomato box for the orchard, tomato patch, potato field, etc. The box has 1-1/2 inch ends and corners, 2 1/2 inch sides.

One of the improvements which will appear this season is the fastening of the cover of the 34, 37 and 56 box crates. Formerly these have been closed by a strip of tin that was turned on a screw and inserted under the edge of wood strip on either side. This new system, however, with the easily broken or bent tin tongue, and uses a strip of wood which reaches across the top catching under both sides and may be raised if crates are to be handled very much.

As there are many hundreds of old styles still in use, growers that would be a loss under the new ruling and the new shape boxes, a schedule has been devised by Mr. Johnson by which some 250,000 specially constructed boxes with straight sides, have been put in stock. These are the collapsible boxes used on the west coast, and the number stocked should take care of several thousand old style crates.

The new plant and quart boxes are put up in lots of 250 quarts and 500 pints and each bundle is well and securely wrapped in heavy paper so that they may be stored for an indefinite time and yet have the fresh appearance when used.

RURAL SCHOOL BEAUTIFYING

Horticultural Council at Ottawa Offers Nine Silver Cups for Competition—One Awarded to Each Province

The following announcement from Ottawa should develop a keen rivalry in hundreds of rural schools throughout Canada. Full information may be obtained from the Secretary, the Canadian Horticultural Council, Department of Agriculture, Ottawa:

"A competition in the ornamental planting of rural school grounds is being inaugurated by the Canadian Horticultural Council. The purpose of the competition is to encourage the planting of ornamental and berry shrubs as well as to suffer for lack of attention during the summer period. The allocation of native shrubbery available locally in many parts of the Dominion and the fine things, equally hardy, obtainable from the nurserymen, give encouragement to the Council in the promise of a charming transformation in the rural school grounds of the country."

The competition, through Dominion-wide, divided Provincially. Nine silver cups have been secured for each Province to be awarded to the rural school accomplishing the greatest degree of beautification in its grounds during the year. The cup will be made of wood, and the school winning three times, not necessarily in succession. With each cup the Council will also give an award of merit certificate, which may be framed and kept in the school as a permanent record.

BORN

JOHNSONSON Tuesday, April 3, 1923, at Grimsby, Ontario, to Major and Mrs. W. Johnson, a son (Charles) McCreesh.

METAL CRAFT ALTERATIONS

Large Additions Being Made to Main Factory—Other Buildings Being Changed to Meet Demands

That business is doing the same is told daily in reports of the factory opening up of buildings on large scale.

Locally this is well shown by the fact that the Metal Craft Limited, is making large additions and alterations to its main Depot street. The main building which has served for more than a half dozen years has been extended, and the rear by adding 24 feet to the old part and the rear of the old part.

This 24-foot addition is not being raised to the full height of the old building, but at a "saw-tooth" roof which will allow of several rows of windows, and the regular windows, and the lighting is practically all outdoor daylight.

None of the new building is the first floor of the old building, but the second floor of the old building is being used for the new building. The new building is being raised from its present level and brought up to the level of the first floor of the old building.

The painting department and the machine shop, which were moved from the old building, are being moved into the new building. The machine shop will be moved into the new building, and the painting department will be moved into the new building.

Adam McGregor has had charge of constructing the new addition and making the alterations to the other buildings.

BIG BOOZE HAUL MISSED BY "MAC"

Driver Deserts Truck and 135 Gallons of Alcohol, Before He Reached Spot Where Grimsby Officer Was Waiting

Ran-runners lost a valuable prize at Beamsville, when a truck, carrying 135 gallons of alcohol, was seized by the provincial police. At two-thirty last Wednesday morning, word was received by Provincial Constable Nelson, St. Catharines, that a truck had left Niagara Falls and was making for Toronto. An attempt was made to intercept the truck at St. Catharines, but the driver refused to stop and Constable Nelson, accompanied by Inspector King, gave chase in an automobile.

The two officers tried repeatedly to run their car in front of the truck, but the driver held the middle of the road, and twice succeeded in ditching his pursuers. At Beamsville, the driver apparently realized his folly of continuing the wild chase. He accelerated for about 100 yards, and drew ahead of the police car, then he was seen to jump clear of the truck and drive through the low hedge by the roadside. By the time the officers drew up the driver had effected his escape.

The truck, which bore a To onto license number, was found to contain 135 gallons of alcohol. At the present price of 40 cents a gallon, the value of the load was between seven and eight thousand dollars.

According to the police, the alcohol was run over the border and repacked in Niagara for shipment to Toronto. The truck was wrapped in copies of a "laggard" paper. No arrests have yet been made in connection with the shipment, but officers are being made to trace the owner of the truck.

Provincial Constable McKay was also notified of the shipment, and he and Motorcycle Officer Walker were laying in wait for the truck along the Highway but it never got as far as their ambush.

TRY GRIMSBY FIRST

WHAT DOES A PRINTER REALLY SELL?
When you place an order for printing, you are not making a purchase, but hiring a service. You employ the printer's organization to the extent required for the delivery of the job.

What do you get?
That depends upon whom you hire. When you employ a salesman, you ask how old he is, married or single, where he works before, how much experience he has, and what kind of work he has done. You ask him to show you his references, his church and lodge affiliations, when he graduated, and a list of other things. All this time you are looking him over to see if he is a good dependable man. You ask all these things and more if you are careful and accurate in your selection of employees.

GRIMSBY STOVE FOUNDRY WORK

Large Force Working and Warehouses Being Kept Empty Through Numerous Orders and Good Business—Sixteen Men Working

Other evidences of advancing industry are all around. Among them is the Grimsby Foundry Company on John street which has been idle but one month since starting business twenty-seven months ago—January 1921.

Not only has business been steady but is now on the increase so that sixteen men have been working five days a week since the first of the year. Nine of these sixteen are journeymen and their occupancy leaves little more room on the moulding floor, and while speaking of the moulding it is in place to mention that each and every casting turned out is "tumbled" and cleaned, whereas most furnace fire pots and inside castings are not so treated. This shop also does a lot of custom casting for other industries in Grimsby—the Canadian Radiant Electric; Brock Snider Mfg. Co.; Metal Craft.

The machine shop and erecting floor in the main building is likewise full to capacity and six complete furnaces a day are being turned out.

Furnaces is the only line this firm is building, and but four patterns are made—or rather two patterns in each of two sizes, 20 and 24 inch, pipe and "modern" hot air furnaces.

The second floor of the main building is occupied by the box and crate making machinery and lumber, a large box of fixtures being a complement of each furnace. The product of the foundry have a wide market, but the greater percentage is disposed of in Ontario—Toronto, Hamilton, Ottawa, London, Windsor, Oshawa, etc.

entering into the making of these furnaces is Canadian. The pig iron, coke and steel all being made in Hamilton, the moulding sand from Sandford, the heating lumber from Northern Ontario—and we might add, there are no "furniners" in the payroll.

In going through the storehouse building with manager Thomas Worsley, one would be inclined to think there was not much doing as the building was only partially occupied. But the furnaces are not made for storage—they are made to "blow" and are going out in small, and larger, and carload lots sufficient to leave plenty of room in the warehouse. And since this is the dull season for furnaces it surely looks as if business was going ahead.

JUNE IS STILL CUPID'S MONTH

Busiest Time of Year For Ministers Records Show One-Seventh of Weddings in 1923 Performed That Month

June is still the most popular month of the year for weddings, with September a rather poor second, and the other autumn months trailing along behind. The report of marriages in Ontario just published shows the time of the year at which Cupid met in his most successful work.

In 1922 there were 14,221 weddings solemnized in the twenty-four Ontario cities at that time. Oshawa has since been incorporated as a city and was a town at that time. Of these happy events almost half were performed in Toronto and over two thousand of them took place in June. September claimed 1,584, and October and November were next in line with 1,455.

April proved to be a surprise in Toronto when weddings suddenly jumped by a score or more every day. The months up to that time had averaged thirteen a day in this city when for the month of April they jumped to twenty a day and in May again fell back to fourteen. There was an average of eight marriages performed in Ontario every day during the month of June, of which thirty-eight were solemnized in the Queen City.

You ask all these things and more if you are careful and accurate in your selection of employees.

Now you don't hire printing—you hire it. Printing can't be good without equipment, experience, intelligence, judgment, sound business policies, good business health and integrity in the organization. Take these things into consideration when you hire your printing.

SMITHVILLE SUFFERS DISASTROUS BLAZE

HAPPINESS HABIT
Money may make the world go round, but it never guaranteed smiles for anyone. Fewer hardships and more pleasures do not necessarily mean more contented people. Happiness is somewhere in the heart.

Always looking for the joys of life will keep one from getting many a jar that would otherwise bring annoyance. Frequenting will wear you out, but the smiling spirit is a tonic. There's a gloomy side to every picture. If you like it, look at it. But if you don't, cheer up and fill your mind with the things you want to see.

FIERY CROSS? ON THE POINT

Numerous "Believers" Become Enraged and Want Vengeance—Would Have Called Out the Troops

Great excitement was caused in town and near by on Friday night, when the dreaded K. K. K. were notified to have assembled on The Point and were burning a fiery cross. Many shivered in trepidation, while others of the more bombastic cried for the assembling of troops to drive the pagans from their rendezvous. However, before anything was done the fire had burned low—and a short time afterward "Bob" Bourne's Sunday school class trooped down the hillside, having finished their vespers.

The fire was first discovered by Charles Robinson, a baker, who was returning home from work. He turned in the first alarm and a second was sent in by A. T. Mitchell, editor of the Smithville Review. Soon afterwards a large crowd had gathered at the scene.

NATION LEAGUE SOCIETY FORMS

Church of Christ, Oshawa, Organized A Grimsby Unit—Large Crowd Attended Meeting

A largely attended public meeting held on Thursday evening, April 2, in Moore Theatre, was addressed by Oliver Hazelwood, chairman of the executive committee, Canadian League of Nations Society, Toronto branch.

on the subject of the League of Nations. Hamilton Fleming was chairman of the meeting and his workshop the mayor spoke on the theme of the evening. On the platform were also Mrs. R. N. Wolfenden, regent of Lincoln Loyalist chapter, I. O. O. F., and A. R. Globe, representing the Lions club.

Proceeding the address of the evening, a violin solo by Miss Metcalf, with piano accompaniment by Dr. Wolfenden, was greatly enjoyed. Miss Doris Bromley gave much pleasure by her beautiful singing. Several educational films of Canadian and other scenery were shown as were also slides relating to Geneva and the League of Nations.

Mr. Hazelwood made clear to his hearers the seriousness of the world situation today, and the great need of the healing work of the League. The speaker illustrated the League of Nations as a physician ministering to sick nations. Mr. Hazelwood requested the wide and varied activities of the League. His hearers could not but be impressed with a sense of personal responsibility.

At the close of Mr. Hazelwood's address a standing vote of thanks was tendered to him, on motion of Mr. Globe, seconded by the mayor. Mrs. Wolfenden then moved that a branch of the Canadian League of Nations society be formed in Grimsby; the same committee which had called this meeting to continue in office, with Miss U. C. Connell as secretary-treasurer. This resolution was carried unanimously.

TRY GRIMSBY FIRST

U. F. O. Hall and Two Stores Completely Wiped Out—Post Office, Drug Store and Dwelling Badly Outted—Beamsville and Grimsby Fire Departments Called on for Assistance.

About one o'clock on Friday morning a telephone call came from Smithville, asking the aid of Grimsby fire department as they had a serious fire on their hands. For some ten minutes thereafter the night operator was kept busy calling members of the department and town officials as it was necessary to get official sanction before the truck could be taken. But quick calls by central, and prompt responses to the calls permitted the truck to get started in about ten minutes.

Many who heard the alarm called central and on learning that the fire was in Smithville, remembered the past disastrous fires that town has had, and several auto loads were soon on the way.

The first alarm was turned in at Smithville about twelve o'clock, and at that time the fire was just nicely started.

A Smithville report of the fire says: The fire apparently started in the U. F. O. building at the rear of J. A. Schrick's merchant tailor and gent's furnishing store. A store next to the tailor shop, only recently vacated by C. A. Griffin, real estate broker, was also destroyed, while the post office, next door, was badly damaged. The drug store, owned and conducted by W. G. Henderson, was gutted as was his home over the store. The stacks in the tailor shop, and drug store were practically all removed before the fire had spread to these buildings, and all the mail in the post office was also carried to a place of safety.

The fire was first discovered by Charles Robinson, a baker, who was returning home from work. He turned in the first alarm and a second was sent in by A. T. Mitchell, editor of the Smithville Review. Soon afterwards a large crowd had gathered at the scene.

For a time it looked as though nothing could save the frame residence of H. Simpson, next to the drug store, and several times sparks set fire to the roof, but they were soon extinguished. The home of R. Kelly, T. H. & B. agent, which was also in the fireman's line, was saved by the firemen. The house was the best of the burning buildings that all the flames in the store were broken. The glass in the hardware store conducted by P. Hays was almost reduced to powder, while glass in St. Margaret's a son's office was also broken. Glass in the grocery store conducted by E. R. Smith, and I. B. Killian, general store, was cracked, and the big window in U. F. O. Club's store were broken.

The U. F. O. hall, which was destroyed, in one of the old landmarks of the town. Whether it will be replaced is not known as yet. All buildings burned were covered by insurance.

Only one accident occurred during the fire, when J. R. Naegarth was struck on the head by a horse while dropping a pole. Mr. Naegarth, after being hit, was removed to a doctor's office in an unconscious condition.

The proprietors of the stores burned, and also those whose places were endangered by the fire, were loud in their praise for the speed with which the Grimsby and Beamsville departments answered their call for help. Had it not been for the chemical trucks sent from these two towns, the damage done by the fire would have been more than treble.

W. G. Henderson, owner of the drug store, on Wednesday, April 4, noticed a Smithville Review of April 3.

MARRIED
SHAW-DIMOND—At "Saint Dunns", Ont. on Monday, March 26th, 1923, by Rev. O. C. Lamont, Baptist pastor, William Harold, fifth son of Mr. and Mrs. H. W. Sharp (formerly of Grimsby), to Winifred, third daughter of Mr. and Mrs. Dimond, Glasgow, Scotland.

MAINLY FOR WOMEN

Absorbent Cotton

A Household Necessity

In this age of preventive medicine, when practically all scientific bodies are engaged in popularizing the knowledge of hygiene and sanitation, it is surprising to find so many households unacquainted with the uses and advantages of absorbent cotton. When the physician is called to an emergency case in these homes, he must, as a rule, be satisfied with makeshift dressings, usually some old linen kept in a drawer especially for such an emergency. Druggists should make it a habit to educate their customers on the use of Absorbent Cotton and surgical dressings, showing them the advantages they possess, their small cost, and telling them why they should always have a small supply in their homes so as to be prepared in case of emergency.

So numerous are the uses of absorbent cotton as a preventive of infection in troubles of the skin, that it is truly strange that doctors and pharmacists do not insist more generally on the necessity of absorbent cotton being kept in every household. The question of cost enters little into consideration, as small rolls of this cotton can be procured at any drug store at prices ranging from five, upward.

There is hardly one woman doing her own cooking who has not at some time or other burned her hands more or less severely while busy at her kitchen range. In such cases absorbent cotton is not only useful in absorbing the scum from the surface, but it is present in severe burns, but it is saturated with sterile acid or even bicarbonate of soda and applied on the burnt surface, it will immediately relieve the pain. It does not adhere to raw surfaces and should be used as a bandage, as it will exclude air, thus favoring the healing of the skin and acting as a screen through which germs cannot pass. When any old piece of convenient fabric is used, there is always danger of infection.

When anybody in the home is suffering from one of the many little skin diseases, such as tooth-ache, ear-ache, pains in the skin, etc., the average woman will not call a doctor; she usually has some favorite family remedy for just such cases. Nothing is better than absorbent cotton when applying poultices, moist dressings, or medicaments to any part of the body, because it preserves heat and prevents the rapid evaporation of volatile drugs, thus enhancing their curative properties.

After a person has been using absorbent cotton as a preventive of infection and to prevent the clinging of underclothing, When salves and ointments are being applied to the skin, as in skin diseases, it is always preferable to use absorbent cotton as the applicator. There is always danger of infection when the fingers are used, as the hands are never aseptic, even when perfectly washed.

Relief from ear-ache is quickly obtained by inserting in the ear a small plug of absorbent cotton dipped in warm oil. When an abscess is present, a small piece of absorbent cotton will not only absorb suppuration but prevent air from causing inflammation.

In cases of profuse bleeding of the nose, or any form of hemorrhage, the use of absorbent cotton is indispensable, as it quickly absorbs and stops the flow of blood.

In infantile hygiene it is invaluable. Many mothers find its use preferable to ordinary sponges when bathing babies, as it is softer and does not irritate the skin; as a powder duster it is more hygienic than the ordinary powder-puff. Wrapped around a tooth-pick, it should also be used to clean babies' nostrils, ears and nails. It is by far the best material to use in cleaning children's teeth until they are old enough to use tooth-brushes.

Many thoughtful mothers pad baby blankets and cribs with absorbent cotton; use it as small pillows and as padding in the bed, noting that it absorbs all moisture and prevents the soiling of bed-clothes.

Inside of babies' napkins the use of absorbent cotton is also urged, as it prevents irritation and incidentally saves washing. It can be destroyed when soiled.

Absorbent cotton is used to advantage in covering bottles containing prepared foods for infants; for corking milk bottles and for filtering babies' food and milk.

In the experience of all mothers it has often happened that when baby awakes in the middle of the night and cries for milk, it was found that the hole in the nipple of the feeding bottle was too large and allowed too much liquid to flow. In such cases the immediate procuring of another nipple is out of the question. Nothing is simpler than placing a piece of absorbent cotton in the nipple from the bottle end, thus allowing the fluid to flow gradually. In such cases a fresh piece of cotton must be used at each feeding. The difficulty of medicating children has been experienced by all mothers. Here absorbent cotton can be used to advantage.

When an analysis of a child is considered necessary by the family physician, it is an easy matter to obtain urine by placing a pad of absorbent cotton in the crib or napkin, afterwards a simple squeeze of the cotton will yield sufficient urine, filtered and ready for analysis.

A jacket of absorbent cotton is the very best heat-preserver that can possibly be used for children in the treatment of bronchitis-pneumonia and other affections of the respiratory organs.

Later, when the child's teething begins, the doctor will find a valuable adjunct in covering the entire blade of the gum with except the small point.

MISTAKES OF IMPOSSIBLE

Even the most experienced of them—With Constant Learning She May Reduce the Probability of Recurrence, and So Acquire a Well-Known Well-Being Home.

Does the thought of many a woman a thrill of glad anticipation, or does it send a shiver of apprehension down your spine? You are happily confident that everything will go off all right, or are you wondering if everything will go wrong? It did last time you attempted to do it.

I know a young housekeeper who will not attempt to do a thing without first consulting her mother. She is giving, too, and the mother was the father and mother of a family—her husband.

She wanted so much to have a nice dinner, perfectly cooked and served. Above all, she wanted to show them that she could manage her own affairs.

She had no maid, but the help of her mother-in-law was attempted. What seemed to her a very easy dinner. But, alas!

When the turkey was being basted, she was set before her and she lifted the cover she found that it was perfect. The turkey was cooked and basted. The in-laws and the mother-in-law—what they did not know, however, was that the turkey was not cooked.

The turkey was not cooked, but the mother-in-law was not to know. The turkey was not cooked, but the mother-in-law was not to know. The turkey was not cooked, but the mother-in-law was not to know.

The turkey was not cooked, but the mother-in-law was not to know. The turkey was not cooked, but the mother-in-law was not to know. The turkey was not cooked, but the mother-in-law was not to know.

The turkey was not cooked, but the mother-in-law was not to know. The turkey was not cooked, but the mother-in-law was not to know. The turkey was not cooked, but the mother-in-law was not to know.

The turkey was not cooked, but the mother-in-law was not to know. The turkey was not cooked, but the mother-in-law was not to know. The turkey was not cooked, but the mother-in-law was not to know.

The turkey was not cooked, but the mother-in-law was not to know. The turkey was not cooked, but the mother-in-law was not to know. The turkey was not cooked, but the mother-in-law was not to know.

The turkey was not cooked, but the mother-in-law was not to know. The turkey was not cooked, but the mother-in-law was not to know. The turkey was not cooked, but the mother-in-law was not to know.

FACTS ABOUT TEA SERIES—No. 2

Tea Production Today

If the Chinese, who first discovered tea, had realized the possibilities of the trade and had studied the nature and requirements of the plant, China might still be the largest tea producing country. Centuries of neglect, however, stunted the growth and caused the quality to deteriorate. In the mountains of Ceylon and India, tea was found to flourish. Scientific methods of cultivation and manufacture were introduced with remarkable results. Now the finest tea grown in the world and by far the largest quantity comes from these countries. "SALADA" is mainly blended from flavoury India and Ceylon teas.

Your Boy's Success

No one starting out in life ever expects to fail. Youth is always hopeful, but hope alone cannot bring success.

If your hope is to see your boy a success in the world, securing independence and comfort—the vision of so many, yet the attainment of so few—adopt a regular savings plan for him now, and teach him in his tender years the value of saving something out of every dollar.

THAT WAY LIES HIS SUCCESS.

News and Views of SPORT

ALL GRIMSBY TRAINED TEAMS HAD MOST SUCCESSFUL SEASON

Canadiens, Saskatoon, Peach Buds, Peach Queens All Went Far in Hockey Race As Well As Peach Kings—Dope Bucket Has Been Sent to the Storehouse.

Well, Speed, we will soon be picking strawberries and basking in the shine of the sun that casts its rays on all sides of the pinkies while the roiling zephyrs wafted from off Joe Hand's playground, Lake Ontario, cool our heated brow, but before we cast the old dope bucket into the storehouse for a six months rest, we must at least review the past hockey season a little just to show the great benefits that Grimsby has derived from the energy and work of Leslie John Farrell and Cecil M. Bonham, the men who built the Grimsby Arena and caused all these beneficial results.

Last fall Grimsby and Montreal Canadiens for the third time trained on Grimsby ice. They finished third in the N. H. L. and defeated St. Patrick's of Toronto in the play-off for the right to meet Hamilton in the finals. Hamilton players showed a Bolshevik strain and went on strike and Dandurand's Dandies were declared champions and hoisted aboard, a C. P. R. train for British Columbia where they met Victorias for the Stanley Cup. If luck dogged their footsteps, and they lost the cup winning only one game out of four played, but their great seasons work showed the benefits of their Grimsby training.

Newby Lalonde brought his Saskatoon Sherks to Grimsby to train. In the Western Canada league race they finished second and were defeated in the play offs by Victoria by one goal. Another team that went far as a result of good early training.

GrimsbY Peach Buds owned and controlled by the mighty hockey magnates "Jimmy" Farrell and Brown MacLough won their group in the junior series of the O. H. A. and defeated Oakville in the third round play-off. In the fourth round they were put out by St. Andrews of Toronto who forced the Aurs. Les champions for a little overtime to beat them one goal on the round. Pretty fair work for a young, green team on its first season out.

Now come the youth and beauty of the Peach Buds, the Peach Queens. This speedy collection of young ladies in the third round of the L. O. H. A. trimmed the famous, tall lumps and made them like it. They lost out in the semi-finals to Toronto Varsity which team won the championship from Ottawa Alerts.

Of course you all know of the remarkable work through the season of the Peach Kings, intermediate champions and cow scrovs of the great Soo Greyhounds, as their feats need not be recounted here.

Is it not a wonderful record for a town the size of Grimsby to have five teams, two professional and three amateur, to train in their rink and every one of them reach the semi-finals or finals in their respective leagues. Grimsby should be thankful and proud of the two boys that made this great feat possible when they fought, worked and schemed in a million ways to put the present arena where it is.

LACROSSE TEAM WILL ORGANIZE

An effort is being made to organize a junior lacrosse team in Grimsby, and a meeting and practice will be held on the school grounds on Good Friday afternoon to get the boys together. Beamsville boys have been asked to come, and with the material that both towns can produce there should be an excellent team formed. Turn out boys whether you have a lacrosse stick or not. Get the team started. Remember lacrosse is Canada's real national game; and develops young menhood more than any other sport.

During his visit to a village where an inspector put this question: "a class of little girls: 'If all the good people were white, and all the bad people were black, what color would you be?' Some answered 'White' and others 'Black'. But little Mary replied: 'Please, sir, I would be grey.'"

JUNIOR TEAM HAS BIG LOSS

The following statement has been prepared showing that from a financial standpoint the past season was a bad one for the Peach Buds. The statement is as follows:

Paid to Hamilton Hockey Club re game at Grimsby	\$25.50
Expenses to Hamilton re Hockey Club game	12.50
Expenses to Niagara Falls re game at Niagara Falls	31.60
Expenses to Port Colborne (exhibition)	20.40
Paid to Oakville re game at Grimsby (second round)	25.00
Expenses to Toronto M. Andrews game	65.55
Expenses to Port Colborne, two trips, (Round Trophy)	74.40
Paid to C. T. Farrell re opponent uniforms	45.00
Account owing C. T. Farrell	32.33
Account owing L. J. Farrell	10.00
Paid to R. H. Kild, re O. H. A. Fees	6.00
Account Dr. D. M. Gesser	2.00
Launched for team re home games	31.40
Account C. P. R. Telegrams	.71
Total	\$583.69

Received from Hamilton Hockey Club	25.50
Received from Port Colborne re Round Trophy	17.50
Received from O. H. A. re home games	264.20
Total	\$307.20
Deficit	\$276.49

Certified correct R. MacLough, L. J. Farrell.

MAKE CHANGES IN GAME LAWS

The Game committee of the Legislature have been asked to consider the Peach and Game Act.

At a meeting of the committee last week partridge was declared out of season for three years except in a few sections where they are plentiful.

The deer and elk seasons remain the same and a proposal to ban the sale of venison was defeated.

A license fee of \$1.00 will be imposed on all guns where the county council requests it except for hunters on their own land.

Concrete Highway on Dundas Mountain, near Dundas, Ontario

Road building programmes must keep pace with traffic growth

This is admittedly a motor age. Our roads are filled with every type of motor vehicle and the number is increasing every day. The mileage of permanent highways capable of sustaining this traffic is totally inadequate.

Paving has become an economic necessity. We could not stop the growth of motor traffic if we would. We must therefore bring our roads up to a standard that will carry it with comfort, safety and economy.

Careful choice of paving material is imperative if we are to keep our road building programmes from becoming a financial burden. Concrete roads are usually the wisest selection.

They are permanent, withstanding the shocks of heavy loads that would speedily demolish a less durable material. They need very little upkeep. They protect the taxpayer's pocketbook.

SOCCER SEASON ON GOOD FRIDAY

Will Open With Game Against Canadian National Railway Team, of Hamilton—Many New Players on Line

No sooner had the hockey sticks been put into the old wood box than the football club was on the ground, choosing up their line joints. Each Tuesday and Thursday evening and Saturday afternoon for the past three weeks the locals have been practising, new prospects tried out, and everything put in shape for the curtain raiser which takes place on the local campus on Good Friday morning at 11 o'clock, with the C. N. R. team of Hamilton.

This season the team is comprised of players from Grimsby, Beamsville and Vineland, and the club is still open to receive any new player who is desirous of signing up.

The clubs that comprised the H. & D. League last season are: Hamilton, somewhat, C. N. R. (1924 Ontario champions), Burlington Steel, A. O. F., Corinthians and Millcrest of Hamilton being the only Hamilton clubs that were seen here last season to enter the competition this year. Grimsby and Beamsville are again on the list, while the newcomers are Zimmerhans of Hamilton, Dundas and Rockton.

The officers of the club for 1925 are: President, J. R. Jackson; Vice-President, E. R. Spencer; Secretary-Treasurer, F. T. Shewbridge; Captain, Geo. F. Warner; Vice-Captain, E. R. Mason; Trainer, Chas. A. Mason.

In the practices that have been held good ability has been shown, Ray Stone of Beamsville being chosen, and Tom Warner being the likely custodian of the goal net. On the full back line we see Dick Snelgrove and Bert Sims, while Geo. Warner, Ernie Mason and Frank Shewbridge or Tommy Agnew fill the positions on the half back line. There is a whole lot of material available for the forward positions, Geo. Brimwell, Jack Jenkins, Arthur Broadley, Chas. Platts, and his brother James, Jimmy Marshall, and Ronald Fitzgerald, all being able to make the grade, and it is a difficult matter that the selection committee has on hand to determine just what the lineup will be for Friday's game.

A general meeting is called for tonight Wednesday, at the home of "Steve" Spencer on Doran Avenue at 7.45 at which all signed players are requested to be present, as well as any other of the fans who have the interest of the club at heart.

Don't forget Friday this week, at 11 a.m. C. N. R. vs Grimsby at the School Grounds.

PLUMS FOR CANADA

(Experimental Farm Notes).
"Comparatively few people get good plums to eat, especially in the fresh condition, and the export trade in plums, whatever it may be in the future, is practically nothing at the present time," writes W. T. Macoun, Dominion Horticulturist. "The plum has not been as profitable to grow in Canada as some other fruits, 'concludes Mr. Macoun,' but with a careful selection of varieties and good care it will be found to give fairly good returns. In those parts of Canada where the European plums do not succeed, the improved native and American varieties have been found very profitable."

A new bulletin by W. T. Macoun, Central Experimental Farm, Ottawa, is now in the press and will very shortly be ready for distribution. This bulletin deals with every phase of plum culture, and among other valuable features, gives a complete list of varieties recommended for the different parts of Canada, from Prince Edward Island in the east to British Columbia in the west. There is also a description of the varieties included in the list just mentioned. This bulletin, entitled "Plum Culture," (No. 45, New Series) which is perhaps the most complete of its kind yet issued by the department, will be sent free on application to Publications Branch, Department of Agriculture, Ottawa.

IN MEMORIAM

In loving memory of my dear son, Edgar Pilly, who passed away, April 12, 1924.

There's a time that is haunting me,
There's a time I am longing to hear,
There's a time I will remember forever.

The I try to forget every tear,
There's a time, but sweet, rememberance,
There's a memory, fond and true,
There's a time of affection, dear Edgar,
And my heart still aches for you,
Sadly missed by Mother and Sister.

SHORTS AND CHOP

A farmer's scientific training is now being put to the length of the necks to his radio. Two blades of grass can often be made to grow where one grew before simply by using better seed.

garden is usually underestimated. It is of real economic importance and is indispensable from the standpoint of good health.

During the year 1924 12,753 horses and 190,267 cattle were shipped from Alberta. Shipments between local points within the Province totaled 5,612 horses and 104,654 cattle.

In pruning the raspberry in the spring the first thing to do is to take out the wood that has been killed during the winter. The biggest percentage of those that are left will bear the most fruit and the best fruit.

This was actually owned in Devon. Two workmen were clearing the place.

"I guess what a B... and one of them. 'The I'll tell you, the B... You've got a B... You give me a B... I've got a B... and I hope it."
